

## Communicable Disease Service

The New Jersey State Department of Health & Senior Services maintains a Web site ([www.state.nj.us/health/cd/index.html](http://www.state.nj.us/health/cd/index.html)) with information on what you need to know about and the reporting requirements for the following conditions:

|                                 |                                    |
|---------------------------------|------------------------------------|
| Amebiasis                       | Legionnaires' Disease              |
| Anthrax                         | Leprosy                            |
| Antimicrobial Resistance        | Leptospirosis                      |
| Arboviral Diseases              | Listeriosis                        |
| - Eastern Equine                | Lyme Disease                       |
| Encephalitis                    | Malaria                            |
| - West Nile Virus               | Measles                            |
| Babesiosis                      | Meningococcal Meningitis           |
| Botulism                        | MRSA                               |
| - Foodborne                     | Mumps                              |
| - Infant                        | Pertussis                          |
| Brucellosis                     | Plague                             |
| Campylobacteriosis              | Polio                              |
| Chickenpox                      | Psittacosis                        |
| Chlamydia pneumoniae            | Q Fever                            |
| Cholera                         | Rabies                             |
| Creutzfeldt-Jakob Disease       | Rocky Mountain Spotted Fever       |
| Cryptosporidiosis               | Rubella                            |
| Cyclosporidiosis                | Salmonellosis                      |
| Dengue Fever                    | Scabies                            |
| Diphtheria                      | Shigellosis                        |
| Eastern Equine Encephalitis     | Streptococcal, Invasive, Group A   |
| E. coli                         | Streptococcal Toxic Shock Syndrome |
| Ehrlichiosis                    | Tetanus                            |
| Flu                             | Tickborne Disease                  |
| Genital Warts                   | Trichinosis                        |
| Giardiasis                      | Tuberculosis                       |
| Guillain-Barre Syndrome         | Tularemia                          |
| Hantavirus Pulmonary Syndrome   | Typhoid Fever                      |
| Haemophilus influenzae type B   | Varicella                          |
| Meningitis                      | West Nile Virus                    |
| Hansen's Disease                | Whooping Cough                     |
| Head Lice                       | Yersiniosis                        |
| Hemolytic Uremic Syndrome (HUS) | Yellow Fever                       |
| Hepatitis A                     |                                    |
| Hepatitis B                     |                                    |
| Hepatitis C                     |                                    |
| Human Papillomavirus (HPV)      |                                    |
| Influenza                       |                                    |
| Kawasaki Disease                |                                    |
