

Are you an Approved Home Provider?

DOUBLE WHAT YOU EARN

By changing from an approved home to a registered family child care provider, you can care for children beyond those you are already approved for. With this extra step to get registered, you will earn about twice as much for each child you are caring for.

For example, if you currently are caring for two toddlers as an approved home provider, your monthly full-time assistance rate would go from **\$603 to \$1,187** for each child by becoming a family child care provider!

How Do I Become a Family Child Care Provider?

You already have done a lot of it by completing your basic health and safety training and background checks! And here is the great part – your Child Care Resource and Referral Agency (CCR&R) is there to help you through the rest of the process by offering technical assistance, business coaching and other supports.

Additional Ways We Can Help You!

Besides making more money per child each month, as a family child care provider, there are two additional ways we will help you to improve your child care business so you can earn even more.

You can become part of Grow NJ Kids, the state's five-star quality rating system. By doing this, it will help increase your monthly rate per child and make your child care program even better!

In addition, there will be a one-time grant available soon that will help you pay for things you may need in your home if you want to care for an additional infant or toddler.

Start thinking about child care as a business!
